### **Speedline Dual Lane Wins New Product Award**

FRANKLIN, MA – May 24, 2011 – Speedline Technologies has been honored with an SMT China VISION Award for its Momentum® Dual Lane technology in the category Printing, Stencil & Screen. SMT China's fifth annual award ceremony was held at the Everbright Hotel in Shanghai on May 12, 2011.

According to Speedline vice president and general manager, Scott Koizumi, "Dual lane capability has gained a significant level of interest in high volume manufacturing regions like Asia, Eastern Europe, Brazil and Mexico. We are extremely pleased to have received recognition of this important technology from SMT China."

Speedline Dual Lane printers can be deployed in any production environment, single or dual lane. While many dual lane printers feature rails with two fixed-mount positions, the Momentum Dual Lane moves all rails under software control and accommodates a wide range of board sizes; an industry-leading 12" wide in dual lane mode, and 20" x 24" in single lane configuration. Both lanes can be positioned near the front of the machine providing optimum flexibility and compatibility with dual lane placement systems.

The SMT China VISION Awards were launched in 2007 to highlight contributions to China's electronic manufacturing industry. This year, 23 new products were recognized with this prestigious award.
